

Alaska's Climate Change Strategy: Addressing Impacts in Alaska
A Report from the Adaptation Advisory Group to the Sub-Cabinet

Table of Contents

Acknowledgements

Executive Summary

Chapter 1. Introduction and Background

Early Actions: Alaska Climate Impact Assessment Commission
Administrative Order 238 and Alaska Climate Change Sub-Cabinet

Chapter 2. Climate Change and Alaska

Climate Change Science and Projections for Alaska
Impacts on Human and Natural Systems in Alaska
Technical Work Groups Supporting Alaska's Adaptation Advisory Group

Chapter 3. Overview of Alaska's Adaptation Strategy

Chapter 4. Public Infrastructure

Impacts and Vulnerabilities
Public Infrastructure Adaptation Strategy
Description of Public Infrastructure Recommendations

Chapter 5. Natural Systems

Impacts and Vulnerabilities
Natural Systems Adaptation Strategy
Description of Natural Systems Recommendations

Chapter 6. Other Economic Activities

Impacts, Vulnerabilities, and Opportunities
Other Economic Activities Adaptation Strategy
Description of Other Economic Activities Recommendations

Chapter 7. Health and Culture

Impacts and Vulnerabilities
Health and Culture Adaptation Strategy
Description of Health and Culture Recommendations

Chapter 8. Common Themes Across Sectors

Description of Common Themes Recommendations

Appendix A. List of References

Appendix B. List of Acronyms

Appendix C. Administrative Order 238

Appendix D. List of AAG and TWG Members

Appendix E. Public Infrastructure: Description of Recommended Options

Appendix F. Natural Systems: Description of Recommended Options

Appendix G. Economic Activities: Description of Recommended Options.....
Appendix H. Health and Culture: Description of Recommended Options.....
Appendix I: Common Themes Across Sectors: Description of Recommended Options.....

DRAFT

ACKNOWLEDGEMENTS

The Alaska Adaptation Advisory Group (AAG) thanks former Governor Sarah Palin for the opportunity to meet and address the issues confronting Alaska due to climate change.

Special thanks for their dedication, thoughtful direction, and good humor are due to Commissioner Larry Hartig of the Alaska Department of Environmental Conservation (ADEC), Chairman of the Alaska Sub-Cabinet, and to Jackie Poston, ADEC Project Coordinator, who coordinated and supervised the activities associated with the AAG and this report.

The AAG acknowledges the collective and individual contributions of the many who worked tirelessly to provide the careful analysis and research underlying the recommendations, and to draft the report itself. Special appreciation is extended to the Technical Work Group (TWG) members (listed in Appendix D) and other participants in the TWG process. For their outstanding organization and dedication, the AAG also thanks Fran Sussman of ICF International, and the ICF team of experts and facilitators:

Melinda Harris, ICF International
Randy Freed, ICF International
Nancy Tosta, Ross and Associates
Barbara Sheinberg, Sheinberg Associates
Jan Caulfield, Jan Caulfield Associates
Kristie L. Ebi, ESS, LLC
Jason Vogel, Stratus Consulting

This work would not have been possible without the valuable coordination and technical assistance provided by Kolena Momberger, Susan McNeil, and Claire Fishwick of ADEC, and support for the Alaska website provided by Joan Hardesty of ADEC and Caroline Cochran and Jeremy Vanderlan of ICF International. Thanks are also due to Rebecca Guterman for assistance with production of the final report.

For assistance in defining the climate impacts of concern early in the process, the AAG would like to thank Sasha Mackler David Rosner (National Commission on Energy Policy of the Bipartisan Policy Center), Deborah Williams (Alaska Conservation Solutions), and Joel Smith and Jason Vogel (Stratus Consulting). The AAG also wishes to thank Ken Colburn, Gloria Flora, and the Center for Climate Strategies (CCS) and its team of experts for providing a template for the start-up of the stakeholder driven process.

For graciously allowing the use of their facilities to host meetings on a gratis basis, the AAG thanks the University of Alaska Fairbanks (UAF) and John Rubini, of JL Properties. For support of the February meeting, the AAG would like to extend thanks to Molly McCammon, of the Alaska Ocean Observing System (AOOS).

The AAG is grateful to Brian Rogers, Chancellor of UAF, for facilitating all of the AAG meetings with determination, professionalism, and a steady hand. We would like to thank UA President Mark Hamilton for recognition of the importance of this project and for supporting the involvement of key faculty from both the Anchorage and Fairbanks campuses (as specified on the AAG list and in the TWG Appendix D). Special thanks also go to Scott Rupp, Sarah Trainor, and Nancy Fresco, with the Scenarios Network for Alaska Planning (SNAP) Team and to Dan White of the Alaska Center for Climate Action and Policy (ACCAP) for their scientific contributions.

Finally, and by no means least, this project was made possible in large part thanks to generous support from Joel D. Scheraga, National Program Director for the US EPA Global Change Research Program and the Mercury Research Program. The AAG acknowledges him for his outstanding contributions to climate science and commitment to help stakeholders develop adaptation measures at the local level.
