**CRITERIA USED to IDENTIFY COMMUNITIES**

<u>GAO – Current Community Relocation Assessment</u>	<u>USACE – Erosion Only</u> (Simplified)	<u>IAWG – 2008 Recommendation Report</u>	<u>Emergency Management</u>	<u>ANTHC</u>	<u>IAWG – 2009 Recommendation Report</u>
<b>Communities Self- Identified</b>  <b>Want to relocate in whole or in part to address flooding and erosion issues</b>	Critical Infrastructure (for example, School, Utilities, Transportation)	<b>Communities were identified in GAO’s <u>Previous</u> Report</b>		Sea level rise & potential for event intensity change	
	Human Health and Safety	<b>Risk to life</b>		Land temperature change	
	Subsistence and Shoreline Use	<b>Risk to public infrastructure</b>		Water temperature change	
	Housing and Population Affected	<b>Risk to private infrastructure</b>		Air temperature change	
	Housing in Parallel	<b>Identified actions in next 12 – 18 months**</b>		Precipitation change & event intensity change	
	Environmental Hazard (for example, Landfills, Sewer Lines, Sewage Lagoons, Fuel Tanks)	<b>Likely one or more of phenomena are impacting communities:</b> Ice free conditions Erosion Sea level rise Permafrost degradation Forest Fires		Changes in months of the year with ice cover	
	Cultural Importance				
	Commercial/Non- Residential				

**\*\*Actions**

- Some of the communities may be directed to existing resources in agencies.
- Some communities may be directed/included in programs being established through the Climate Change Sub-Cabinet, like community planning in DMVA or DCRA.
- Some communities may need to be included in IAWG recommendation report as needing capital projects.
- Some communities may be identified by the IAWG as high priority communities that need to receive attention by agencies with resources.
